

The 4 Levels of AI — Self-Assessment

Where is your organisation really — and what is the next step up? · Bam Cloud AI

How to use it: For each area you own, tick the highest level you have actually reached (not where you hope to be). Then write the one task per area that is begging to move up. Total takes about five minutes.

Function / area	L1	L2	L3	L4	One task that should move up a level
Sales / Business Dev	☐	☐	☐	☐	
Marketing	☐	☐	☐	☐	
Finance / Admin	☐	☐	☐	☐	
Operations	☐	☐	☐	☐	
HR / People	☐	☐	☐	☐	
Customer Support	☐	☐	☐	☐	
IT / Engineering	☐	☐	☐	☐	
Leadership / Strategy	☐	☐	☐	☐	

Scoring key

L1 · Chat	You ask AI questions and use the answer (smarter search). Nothing is saved or repeatable.
L2 · Automate	You have automated at least one repeated, tedious task so it runs the same way every time.
L3 · Build	You have built a small tool/app that removes friction — usually without traditional code.
L4 · Shared apps	You ship things teammates or customers rely on — an operating capability, not a personal hack.

Your single next step (write it here): _____
